Examiner, Art Unit 2162

DETAILED ACTION

1. This action has been issued in response to Applicant's Amendment and Remarks made on 06/10/2009.

Information Disclosure Statement

2. As required by M.P.E.P. 609(C), the applicant's submissions of the Information Disclosure Statement dated 06/10/2009 is acknowledged by the examiner and the cited references have been considered in the examination of the claims now pending. As required by M.P.E.P 609 C(2), a copy of the PTOL-1449 initialed and dated by the examiner is attached to the instant office action.

Allowable Subject Matter

3. After a thorough search and examination of the present application, and in light of prior art made of record and Applicant's Amendment and Remarks, claims 1-11 (Renumbered 1-11) are allowed.

Reasons For Allowance

4. The following is an examiner's statement of reasons for allowance:

Claim 1 is statutory under 35 U.S.C. § 101 because it is a process claim that transforms a particular article into a different state or thing and is tied to a specific machine. For example "calculates an overall damage condition of the rail equipment from the information input into the data entry system," automatically assigns one of a

Art Unit: 2162

plurality of dispositions to the rail equipment” and “generates at least one report showing the overall damage condition of the rail equipment and the disposition automatically assigned by the data entry system to the rail equipment” transforms a particular article into a different state or thing that imposes a meaningful limit on the claim’s scope and transformation involves more than insignificant extra-solution activity, and “providing rail equipment ... inspecting the rail equipment ... providing a database ...data entry system“ ties a method to a specific machine that imposes a meaningful limit on the claim’s scope and the use of the machine involve more than insignificant extra-solution activity. (*See Fig. 1*).

The primary reasons for allowance of claim 1 in the instant application is the combination of all the limitations and specifically the limitations of:

“calculates an overall damage condition of the rail equipment from the information input into the data entry system; automatically assigns one of a plurality of dispositions to the rail equipment based on an-the overall damage condition of the rail equipment wherein the plurality of dispositions includes not repairing the rail equipment, repairing the rail equipment using a mobile repair unit and repairing the rail equipment at a repair facility, wherein the mobile repair unit is a vehicle equipped to provide mechanical services to the rail equipment without requiring the rail equipment to be moved to a repair facility; and generates at least one report showing the overall damage condition of the rail equipment and the disposition automatically assigned by the data entry system to the rail equipment”

Art Unit: 2162

Applicant's Remarks filed 06/10/2009 on pages 5-11 as they relate to *Gibbs, Good and Kidd* are persuasive. Specifically arguments regarding generation of the report based on overall damage condition of the rail equipment and the disposition automatically assigned by the data entry system were found to be persuasive. Thus the combination of specific steps disclosed is not taught or made obvious.

The dependant claims 2-11 depending upon claim 1 are also distinct from the prior art, since they incorporate the limitations of claim from which they depend.

An updated search for the prior art in EAST database and on domains (NPL-ACM, Google, Google Scholar, NPL-IEEE) has been conducted. The prior art searched and investigated in the database and domains does not fairly teach or suggest the teaching of the newly amended claimed subject matter as described above and reflected by the combined elements in the independent claim 1.

The prior art of record neither anticipates nor renders obvious the above-recited combination.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
